

IC-425-G

2U RACK COMPUTER FOR CONTROLLED APPLICATIONS

KEY BENEFITS

- ▶ Latest Intel 7th generation processors deliver increased performance and efficiency
- ▶ Robust industrial chassis design extends platform lifespan
- ▶ Fully controlled chassis limits costly design changes
- ▶ Industrial-grade, fine particle washable fan filter for dusty environments
- ▶ Lockable front door to prevent unauthorised access to power switches and I/O
- ▶ High performance, multi-fan design for extended ambient operating temperatures
- ▶ Customisable chassis options such as branding and colour

The new IC-425-G series from Captec is our most robust off-the-shelf 2U platform. Designed for challenging environments where rack space is at a minimum, it features a short depth 2U chassis with industrial grade filtration. It offers our highest level of BOM control in a 2U form factor, positioning it as an ideal solution for industries such as oil and gas where platform consistency in a space-restricted environment is essential.

Each model incorporates robust industrial-grade components designed for 24/7 operation and is backed by extended platform longevity. To ensure exact customer requirements are met, we offer customisation services such as chassis colour modification and branding.
