eBINGO SOLUTIONS

What we do

We are the leading designer and manufacturer of eBingo solutions in the UK. We supply 8 and 10-inch electronic bingo terminals and small footprint, cable-less multi-bay charging stations to major customers including Buzz Bingo and Mecca Bingo.

Where we add value

We support our customers with proven through-life support and service level agreements, delivering reliable, ergonomic and high performance solutions that maximise uptime, reduce total cost of ownership and increase revenue.

Ergonomic tablet and charging solutions designed to deliver optimal uptime, an improved gaming experience and maximised revenue.

8-inch X232 tablet

Our slimmest, lightest and most powerful gaming tablet yet. The X232 is engineered for complete functionality to support, run and optimise venue-based electronic gaming applications.

- Uninterrupted, all day gameplay
- Ergonomic handle and stand for ease of use and transportation
- Dual batteries for longer gameplay
- Proven, reliable WiFi connectivity

10-inch X230 tablet

The new X230 has been developed to deliver enhanced graphics and playability through the larger 10-inch screen while delivering all the same features of the X232.

- Rapid game and content upload with wired connectivity option
- Ergonomic handle and stand for ease of use and transportation
- Dual batteries for longer gameplay
- Larger screen provides optimised playability

Multi-tablet charge stations

These charging stations have been designed to keep large tablet estates fully powered in a compact footprint. The cable-less stations are engineered to simplify and improve the charging process.

- High density 16,20, 48 and 60 bay models
- Save valuable venue space
- Enable self-service
- Built-in cooling and timeswitch

SERVICES

Through-life support

To back up our eBingo solutions, we provide technology refresh services and through-life support tailored to the needs of your application, with a dedicated service centre staffed by experienced technicians well-versed in the needs of the bingo industry.

- Three day turnaround
- UK service centre
- On-site repairs
- Obsolescence management

Estate refresh services

We provide casing solutions to accommodate Dell tablets into the Captec multi-bay charging stations for mixed estates while adding the extended features of the X23 series.

- Estate recasing
- Prevent issues with charging cables
- Extended battery life
- Improved ergonomic features
